Shravani Umale

Software Engineer

To work as a DevOps Engineer in a dynamic and challenging environment, utilising my skills in automation, cloud computing, and CI/CD pipelines to enhance software deployment efficiency and streamline infrastructure management.

WORK EXPERIENCE

Software Engineer
Cognizant Technology Solution (CTS)

12/2021 - Present *Bangalore*

Tasks

- Worked with AT&T Client (Direct TV) on Commerce Tool Application.
- **CI/CD & Automation** : Designed and managed Jenkins pipelines for continuous integration and deployment, automating build, test, and deployment processes to reduce manual intervention by 60%.
- **Infrastructure as Code (IaC)** : Developed Terraform scripts to provision AWS resources (EC2, S3, RDS, VPC), streamlining infrastructure deployment and ensuring consistency across environments.
- **Containerization & Orchestration** : Built and deployed microservices using Docker and Kubernetes, improving scalability and reliability of applications.
- **Configuration Management** : Automated server provisioning and configuration using Ansible, reducing setup time for new environments by 50%.
- **Version Control & Branching Strategies** : Managed Git repositories, implemented Git branching strategies, and facilitated seamless collaboration across teams.
- **Cloud & Monitoring** : Monitored system performance and application health using Prometheus and Grafana, ensuring proactive issue resolution and minimal downtime.
- **Security & Compliance** : Implemented AWS IAM roles and security policies to enhance access control and compliance with best practices.
- **Collaboration & Troubleshooting** : Worked closely with development and QA teams to optimize deployment processes, troubleshoot infrastructure issues, and improve system reliability.

EDUCATION

B.E. in Information Technology
Sipna College of Engineering & Technology, Amravati

06/2017 - 06/2021 *7.41/10.00*

Higher Secondary Education
Tulsabai Kawal Vidyalaya Patur (Akola)

2016 - 2017 *78 %*

Senior Secondary Education
Adarsh Convent School Chikhli

2014 - 2015 *78%*

SKILLS

Linux | Git | Jenkins | Python | Docker | Kubernetes | Terraform | Ansible | AWS (EC2, S3, VPC, IAM, CloudWatch) | SonarQube | Computer Networks

ACHIEVEMENTS

HackwithInfy – Infosys
*Actively participated in the **HackwithInfy** hackathon organized by Infosys and achieved strong performance, demonstrating problem-solving and coding skills.*

CodeVita – TCS
*Competed in the **CodeVita** coding competition by TCS and advanced to Stage 2, showcasing advanced algorithmic and coding abilities.*

PERSONAL PROJECTS

Automatic Inventory System
- An application that manages the stock system automatically.
- Basic functionalities include login, sign-up, searching for an item, adding stocks, deleting stocks e.t.c.
- Send alerts and notifications to shopkeepers when there's over- or under-stocking beyond a defined threshold.
- Technologies: Java , Spring Boot , SQL , Angular, JASPYT-Encription (for password hashing).

Bird Species Identification (10/2020 - 04/2021)
- Based on a method to identify the bird species using a Machine Learning algorithm (CNN)on the dataset for classification of the image.
- It works on the principle-based on detection of a part and extracting algorithm features from multiple layers. These features are aggregated and proceed for further clarification.
- Technology- HTML, CSS, JS, MySQL MariaDB, Tensor Flow, ML5.

CERTIFICATION & COURSES

AWS Certified Cloud Practitioner certification

Docker & Kubernetes Certification

Python Certification
